Dr. Brendan Stack
DDS, MS

Specialist in Orthodontics,
TMJ, Snoring &
Sleep Apnea

Dr. Stack is an orthodontist who has limited his practice to Orthodontics, Craniofacial Pain and TMJ Disorders for more than 42 years. Having graduated from Georgetown University, he was also the Tufts’ University (Boston) 2003 recipient of the “Lifetime Achievement Award” for his years of contribution to the field of Craniofacial Pain. He has published peer reviewed literature on the long-term results of his treatment procedures. Having contributed chapters to TMJ textbooks and written numerous articles and manuals on diagnosis and treatment, Dr. Stack has dedicated his career to providing patients and professionals the information they need to understand Craniofacial Pain and TMJ Disorders.

Website: www.tmjstack.com

Part II: Case Finishing (10hrs)

Diagnosis & treatment of a patient with left reciprocal clicking (Class I, teenager with headaches of 2-3 years), TMJ problems in children, preteens and teenagers, Seven signs of successful treatment, Treatment Programs, Stage II crown and bridge finishing, Stage II orthodontic case finishing, Vital sign changes due to splint design.

Part III: Imaging (10.5hrs)

What is the ‘minimum acceptable’ radiographic TMJ work-up?, Panorex (OPG) Imaging – non-dental considerations, Transcranial Imaging – anatomical & functional considerations, Lateral Skull Imaging – with oropharyngeal airway evaluation, Frontal Skull Imaging – with upper cervical spine evaluation, Submentovertex Imaging – for cranial base distortions, migraneurs & refractive cases, Cervical Spine Imaging – frontal & lateral views, Tomography – for osseous degenerative changes, condylar position & condylar movement, Arthrography – dye injections into the TMJ, Arthrography – combined with transcranial radiography, Arthrography – combined with tomography, CAT scans – for increased bone definition, Nuclear Bone Scan – to evaluate osseous degeneration or repair, Magnetic Resonance Imaging (MRI) - to determine disc position. Many cases shown.

Each program includes a BONUS VIDEO of Motor Disorder Patients.
